

THE BEDROOM DIRECTORY 2019

DOORS & ACCESSORIES

1.01 - 1.104

WELCOME TO THE PWS BEDROOM DIRECTORY

As part of our continued development, we have recently integrated our sister brand, Kindred Bedrooms, with the core PWS proposition. This means that bedrooms are now available in both complete and component format, extending the tried and tested PWS formula into the bedroom.

There are many new advantages with bedroom furniture now sitting alongside kitchens, including a much larger and flexible range of components across both the component and complete offerings. This includes our made-tomeasure door ranges, such as Unity, Stanhope and Alpina and the highly popular sliding wardrobe collection.

At PWS, we bring together market leading products with best in class service to support our customers in doing what they do best: making and selling exceptional kitchens and bedrooms.

By listening to our customers, we believe we have produced a really exciting proposition, built on a mixture of our expertise and knowledge and the all-important customer feedback.

We hope you enjoy the new PWS Bedroom Directory.

WHY CHOOSE PWS BEDROOMS

At PWS we believe it's essential that our customers - whatever size and type they may be - are provided with a comprehensive product, service and support proposition, made up of a clear set of proven commitments:

We aim for much more than a mere transactional relationship with our customers. We want to understand your business and your goals and develop a partnership, via which we can tailor and provide specific product, service and

Exceptional Service

Dependability, expertise, knowledge, responsiveness and communication are critical in a multi-faceted industry and these values sit at the very core of PWS. Our service culture is personal, efficient and reliable

Quality always

Quality begins and ends with the customer and we strive to always satisfy your needs. To this end, we have a global perspective in sourcing only the very best products and materials across our categories from around the world, underpinned by a policy of continued improvement in process and service.

Extensive portfolio

PWS has one of the largest and most inclusive ranges of bedroom products, componentry and an extensive range of bespoke options. Such breadth means huge flexibility, allowing customers to select either individual or multiple components and complete furniture from one single source, depending on the scale and nature of their own business.

Leading innovation

We want to pioneer and define our sector. And as a long-established organisation, we have unrivalled access to consumer and industry intelligence across product and process trends, which enables us to innovate, differentiate and launch fast.

Bespoke service

Unity, Alpina, Stanhope doors and Sliding Collection are all available as made-to-measure, in an extensive range of colours, finishes and edge options.

Unrivalled brands

The PWS stable of retail brands transforms our products into inspirational, relevant and desirable consumer kitchens and bedrooms befitting the UK retail market. Our Kindred brand is becoming more established in the retail market place and we are positioned to attract a realistic consumer audience.

Superior marketing

We have led the way in producing beautiful, exceptional quality marketing collateral, using best in class interior photography/CGI across a range of platforms to suit a number of business types. This in turn is reinforced by integrated multi-channel marketing activity, including PR, advertising, social media and meaningful events at two design centres, all created to help you reach your customers.

Design centres

Created to provide tangible inspiration for the development of your own retail spaces and your consumer bedrooms, our two national design centres, not only shows beautiful displays, but offers much more as training and development hubs running a diverse programme of events on important topics from design and installation, to marketing.

A FIFTH GENERATION BUSINESS

FOUNDED IN 1909

We're a proud UK business that supplies quality furniture components and worksurfaces to manufacturers, retailers and installers across the UK.

Our story began over 110 years ago, as a family run independent business in County Durham. From day one, our approach was to create a furniture collection that was innovative, flexible and good quality, all at an affordable price; values we still hold today.

In 2016, we made room for Kindred, our bedroom brand.

Our unique approach has cleverly merged British and Italian design to develop a range of beautifully crafted collections, while our understanding of the demands of modern British living, has led to our recent launch of our made-to-measure collection.

With a family of carefully selected specialists across the country we brought fitted bedroom furniture back to the 21st century. Retaining our core values; our aim is to 'create' a space our customers truly deserve, somewhere to relax, share memories but most importantly, a place to call home.

INSPIRATIONAL DESIGN CENTRES

Strategically located at PWS' Southern and Northern business hubs, our design centres are the best platforms for inspiration, where you can browse an abundance of stunning bedroom displays, and see our exceptional products and materials up close.

Available for you to use as an extension of your own showroom, you are free to show your customers around, explore hundreds of samples, and join our regular training events.

Visits to our design centres are arranged on a pre-booked appointment basis. Please contact our bedroom team who will be happy to schedule this for you.

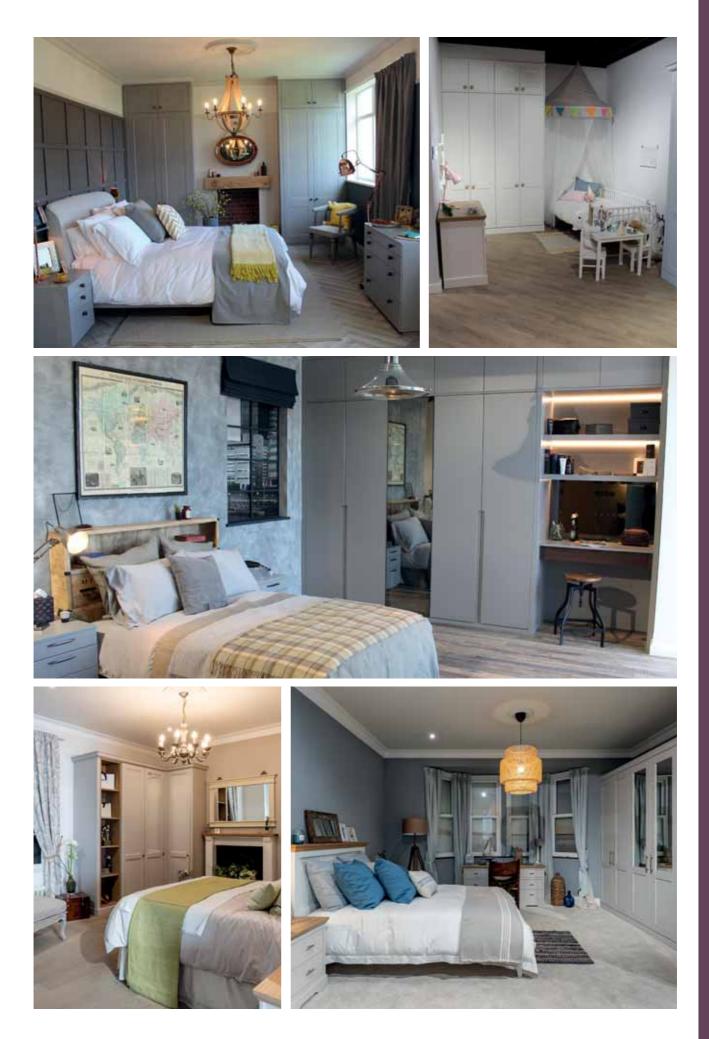

Northern Design Centre Aycliffe Business Park, Newton Aycliffe, Co. Durham DL5 6EQ

Southern Design Centre 778 Buckingham Avenue, Slough, Berkshire SL1 4NL

SHOWROOM DESIGN SERVICE

All bedroom customers can have access to our showroom design service. Our experienced designers will work closely with you to create tailored bedroom displays to fit beautifully, accurately and commercially in your showroom.

Consumers like to buy what they have seen. So, asking our designers to help you replicate one of our signature looks in your showroom, helps to ensure a consistent consumer journey with a design that they may have already seen in our brochure and on our website – becoming something they can trust and imagine in their own home.

On hand to help with all elements of your showroom design, from bespoke concepts, to work/meeting spaces, entrance ways, sample/specification areas, as well as providing advice on styling and interiors, our designers can help you consider every last detail to create effortless flow and maximum engagement - truly bringing your space to life.

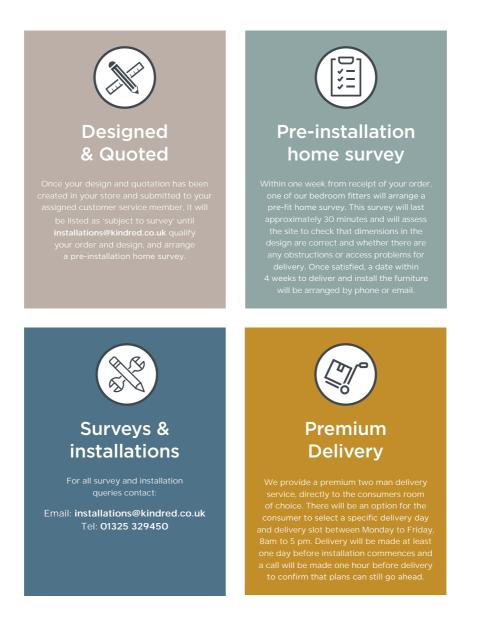

COMPLETE BEDROOMS INSTALLATION PROPOSITION

When purchasing a complete bedroom we can offer you additional services.

INSTALLATION - COMPLETE BEDROOMS

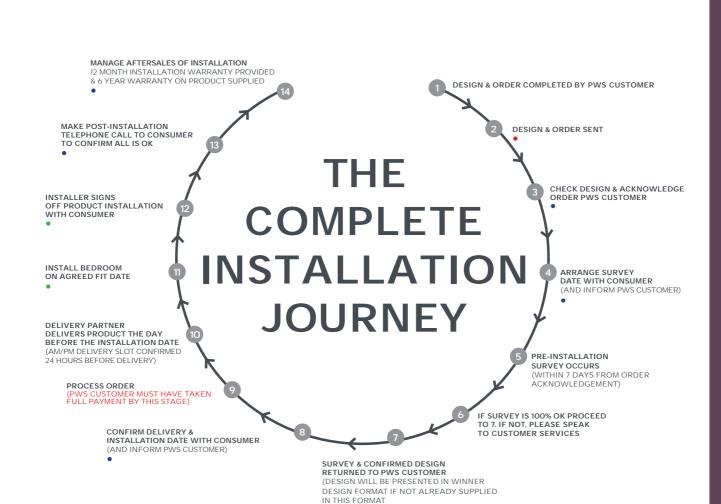

We offer an optional full installation service to our customers. All of our Bedroom installers have had intensive training to ensure that they can continue delivering you an exceptional service. From initial design to installation you can be assured that your customers fitted bedroom will be installed within four to six weeks of the order being placed.

BEDROOM MARKETING SUPPORT

CONSUMER LITERATURE

Our high quality, inspirational consumer brochures feature a mix of room set, product and lifestyle photography to help your customer create their dream bedroom.

- The Bedroom Collection
- Kindred Brochure*

To order, please speak to your Area Sales Manager or Bedroom Team.

Door stands available Kindred branded and unbranded*

DOORSTAND

Doorstands are the perfect way to display our door ranges in your showroom. Ideal for smaller spaces where room is at a premium, these units allow you to store frontal samples in a compact, tidy way.

Designed to give customers quick and easy access to all sample door styles and colours in one place. Each door stand holds 15 doors. Manufactured from Egger U961 board and 3mm ABS edging with Kesseböhmer door display rails.

Available Kindred branded and unbranded for Bedroom Collection.

UNIT DIMENSIONS

Height 2100mm x width 433mm x depth 600mm

Supplied boxed, flatpack with cam and dowel fixings. Full assembly instructions.

Order code	Description
KD/DOORSTAND	Kindred door display stand, 2100x433x600mm (No doors)
	Choose your own doors from our price list.*
DOORSTAND	Unbranded door display stand, 2100x433x600mm (No doors)
	Choose your own doors from our price list.

SAMPLE DOORS

All of our ranges are available as samples in either 447x397/397x447 or 570x397 (Unity/Stanhope/Alpina size) to help you illustrate key features and benefits of each design to your customer - see price list for sample doors.

*Please speak to your Area Sales Manager about our Kindred partner programme (see page 16).

HANDLE BOARDS

Handle boards are the perfect way to display the wide range of handle options we have available. With the ability to hold up to twelve styles, simply choose the handles you want to display from the handle section in this directory.

Order code BHANDLE/BOARD BHB/CLIPS

Description Blank handle board and clips to attach handles Additional clips

COLOUR SWATCHES

Designed to be a quick and easy tool to showcase all colour options in a handy briefcase size. These swatches can be left on display for browsing customers as they are fully labelled with range and colour references.

Modern, Classic & Internal Accessory Swatches. 3 x Individual come as 18mm rectangular sample sets.

All of the available finishes in our Alpina made-to-measure ranges are available in a swatch booklet.

Stanhope and Sliding samples available on request.

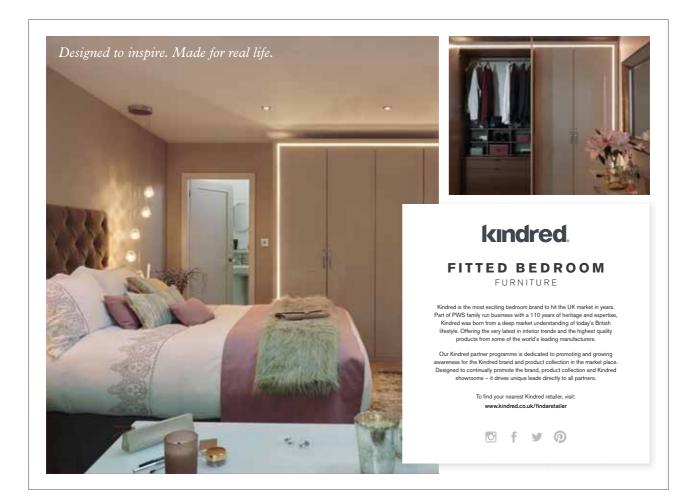

Order code	Description
KDMODSWATCH	Colour Swatch, Modern Collection and Internal Accessories

STANHOPE/SWATCH	Stanhope swatches

Unity 355x297 sample available. Please see the price list for more information.

Please speak to the Bedroom Team about Unity doors for your door bar.

KINDRED PARTNER PROGRAMME & MARKETING SUPPORT

Our PWS partner programmes are specifically designed to support independent retailers. Reinforced by dedicated PR and marketing campaigns, they create more market awareness, and drive unique consumer leads directly to our accredited partners.

Accredited members of our Kindred partner programme will benefit from:

- 1. Local consumer leads to your showroom
- 2. Priority business support
- 3. Training and support for your business
- 4. Design support
- 5. Installation support
- 6. Use of the UK's best design centres
- 7. Best-in-class marketing support
- 8. Being part of our national brand building campaign

To join our family of successful brand partners simply include at least one Kindred door display starter pack or at least one full bedroom display in your showroom. Please contact your Area Sales Manager for further information.

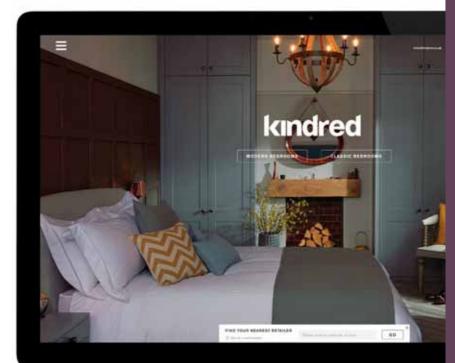

WE DRIVE LOCAL CONSUMER LEADS TO YOUR SHOWROOM

www.kindred.co.uk

All of our national marketing and brand building activities are designed to continually drive consumers to our website, and subsequently generate unique sales leads which are passed directly to your showroom.

All Kindred dealers are listed on our website in the form of a personalised 'where to buy' page, which aims to capture all consumer brochure requests from your area, encourage customer visits to your showroom and capture direct appointment requests.

SIGNAGE

We offer a range of different types of signage in order for you to choose the best possible options for your store depending on your available space.

Choose from wall mounted, hanging and door signage, range overview posters, window stickers and more.

KINDRED IN THE PRESS

PWS has strong and established relationships with the KBB press, and our experienced PR team is there to advise you on the best strategies to market your business to your local customer base. We're very successful in securing regular press coverage and raising national awareness for our branded collections such as Kindred in your local area, offering help and guidance on everything from magazine advertising, case studies, local and national press releases, to award entries, your own customer promotions and events and even graphic design support.

NATIONAL BRAND BUILDING CAMPAIGN – WITH TAILORED PR AND MARKETING SUPPORT

As part of our Kindred community you will benefit from national press, social and google advertising - all designed to drive leads to your business.

We are continually very successful in securing coverage of Kindred Bedrooms in major trade and consumer, home interest and lifestyle titles. As a member of the partner programme, you will benefit from greater visibility and greater consumer awareness, all designed to drive more customers to your door.

Our expert team can provide local marketing advice on promoting your business in your area and getting the most out of the programme.

ITCHEN

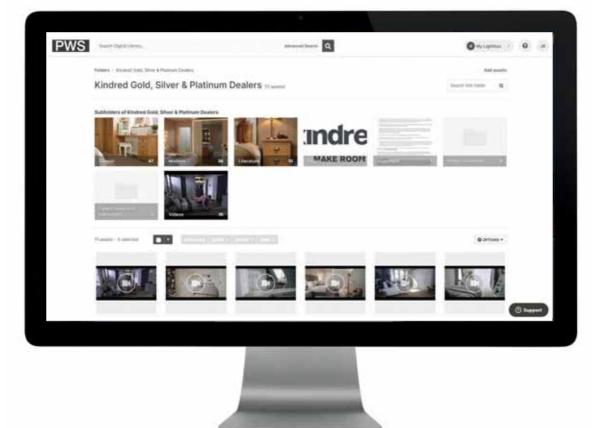

ASSET BANK

Asset bank is an online portal designed to allow a Kindred dealer to access, view and download high resolution imagery, videos, brochures and campaigns as soon as they are released direct to your own computer.

To gain access to Asset Bank please contact the marketing department on 01325 621 373 to be given a login based on your account status. You will need to follow the link sent to you, to generate a password and then the access is unlimited.

 ORDERING WITH CODES FROM 'QUICK-GLANCE' SIZE LIST For quick ordering, accessories can be ordered with supplied codes – please see relevant pages in this section for more information.

COMING SOON TO TRADEZONE

2. ORDERING BESPOKE DOOR SIZES

The PWS Price List includes a 'next-size-up' pricing table for all made-to-measure ranges that can be used to understand instant pricing for bespoke sizes.

*MADE-TO-ORDER delivery dates will be confirmed with each order acknowledgment.

WHEN PLACING ORDERS FOR MADE-TO-ORDER DOORS, PLEASE BE AWARE OF THE FOLLOWING:

Orders for made-to-order door ranges can be placed by fax or email.

Upon receipt of each order to PWS you will receive an itemised order acknowledgement.

Due to the bespoke nature of made-to-order products, it is not possible to cancel or amend orders once placed.

Additions to an order will be processed as a new order.

Orders for made-to-measure product will be despatched upon completion of the full order. No part orders will be despatched.

PWS cannot accept the return of surplus made-to-order product that may have been ordered incorrectly.

Although we strive to maintain consistency, there may be batch-to-batch variances with made-to-measure product.

We cannot guarantee an exact colour match between orders.

PWS made-to-order ranges depicted in our marketing materials are indicative of the colours, however colours may vary batch to batch.

THE MADE-TO-MEASURE COLLECTION

Unity is a made-to-measure collection of edged slab doors, available in an extensive choice of 20 finishes including high gloss, soft-touch supermatt, metallics and woodgrain effect, with a choice of two edge options. Manufactured in the UK, doors are available in any size (up to 2540mm high x 897mm wide) and with the additional flexibility of angled doors, it makes Unity ideal for bedrooms.

UNITY SHOWN IN SUPERMATT LIGHT GREY AND SUPERMATT PURE WHITE

KEY FEATURES

- Fully made-to-measure collection manufactured in the UK
- 20 stunning finishes in 4 different finish types
- Two edge options
- Angled doors
- Drilling service
- 11 day lead-time
- Six-year guarantee

COLOUR OPTIONS AND FINISHES | All available in made-to-measure sizes.

Notes:

Metallic colours have a directional finish as indicated by arrows on the protective film. Arrows should all face in the same direction when fitting. Drilling must be specified left or right hand with metallic doors.

SUPERMATT FINISHES (Matching edge only)

WOODGRAIN EFFECT (Matching edge only)

Notes: All mfc woodgrain effect finishes come in a vertical grain direction as standard and matching edge only.

EDGE OPTIONS

Matching AirTech Edge

Two-Tone 3D glass effect (Gloss doors only)

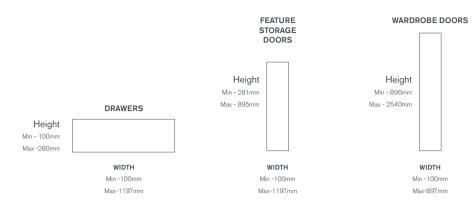

NOTES:

- Two-tone 3D glass effect edging is available
- End panels are edged all 4 sides as standard and are supplied in matching edge only
- Pelmet & plinth are edged on one long side only with a matching edge. •

UNITY COMPONENT

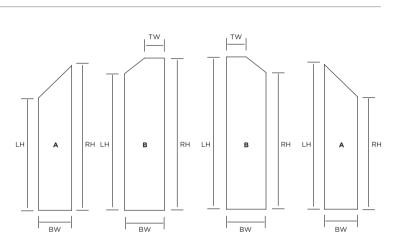

Made-to-Measure size guide

MADE-TO-MEASURE SIZES

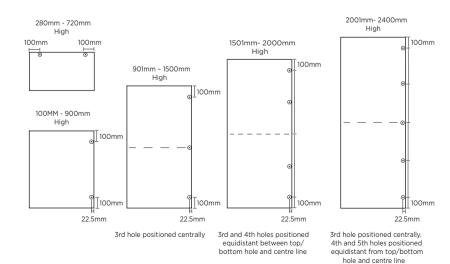

ANGLED DOORS

- Angled doors are available within the same door size parameters listed above (up to 2540x897mm)
- When ordering, please specify the type of angled door (A or B) and dimensions for Left Hand Height (LH), Right Hand Height (RH), Bottom Width (BW) and for stepped angled doors specify Top width (TW).
- Additional 5 day lead time will apply to orders that include angled doors.

DOOR DRILLING SERVICE

Default hinge holes by door size (based on standard PWS drilling pattern – see below) Please note: illustrations shown are Left Hand.

- A door drilling service for Unity is available, charged at £1 a hole.
- PWS's recommended standard drilling pattern is 100mm (+/- 1mm) from the ends with a 13.5mm deep hole (+/- 0.5mm), hole diameter of 35mm (+/- 0.2mm) and centre of hole 22.5 (+/- 0.5mm) from the side from side.
- Door drilling can be selected at the point of order on Tradezone or by completing the PWS 'UNITY ORDER FORM'.
- Additional hinge holes will be drilled by default depending on door height as indicated in the above illustrations.
- Top Box drilling is available for door heights between 280-720mm high (Top Box application must be specified at the point of order).
- Due to a directional finish, drilling on metallic doors should be stipulated left or right hand (please note illustrations shown above are left handed).
- Drilling is not available on angled doors or end panels.
- Please allow 2 days' additional lead-time to all orders that require drilling.

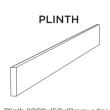

When ordering, use the pre-fix codes for the relevant colour in place of **

SLIDING

HOW-TO-PLAN YOUR SLIDER

Measure your space

Ensure you are fully equipped to start planning. Measure your space wall to wall, including ceiling heights. Remember to note down things like:

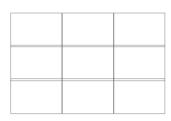

- Sockets
- Switches

STEP

1

- 1 Window ledges
- ✓ Radiators

- ✓ Doors

Create a wardrobe run

You will need to decide how many doors you would like for your run. Whether its 2, 3 or 4.

Please bear in mind if you are using internal storage how this would work with the number of doors you require.

- * Minimum door = 600mm
- * Maximum door = 1100mm

Choose your Aluminium frame profile

Depending on the look you are aiming to achieve with your sliding wardrobe will depends on the frame you may choose. We have five frame types and six frame colours to choose from; some may be easier for you to open than others as each frame type has a different shape.

Its best that you take the time to select the frame that is best for you as once selected it cannot be changed.

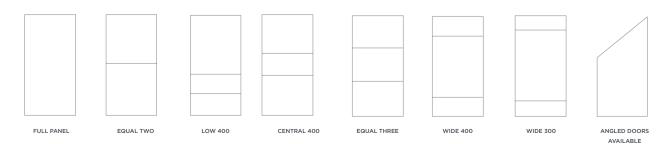

Choose your door designs

Choosing your desired door design may come hand in hand with choosing how many doors you require; If you would like your wardrobe to look a certain way it may depend on the width of your space determining how many doors you will require.

When you know, you can choose any mix of door designs within your wardrobe run, with any mix of colours or materials.

Choose your door finishes

Choose from over 35 colours across matt and gloss coloured board, woodgrain board, glass, satin glass and mirror. Whether you would like all one colour or mix of materials the choice is yours.

BOARD COLOURS

WOODGRAIN BOARD COLOURS

GLASS COLOURS

SLIDING

STEP

Δ

If your wardrobe is going wall to wall you will only require liners but if you require one or two ends open, you will need to choose an end panel as well as a liner. You can choose from matt and gloss coloured board or woodgrain board to frame your wardrobe.

If you need a bit of help on what colours complement each other, why not take a look at our pairing guide on page 96.

2800mm L x 620mm W x 18mm D 2800mm L x 100mm W x 18mm D

Choose your shelf and hanging rail

Whether you simply want a shelf and hanging rail or something a bit more, you can tailor the internals depending on your storage needs.

HANGING RAIL

The shelf is supplied at 2800mm (length) $\,$ x 620mm (depth) with 2 x support batons.

The hanging rail has a maximum width of 2500mm. Please be aware of this when planning internals.

WOODGRAIN BOARDS

CLASSIC PORCELAIN

Hanging Rail

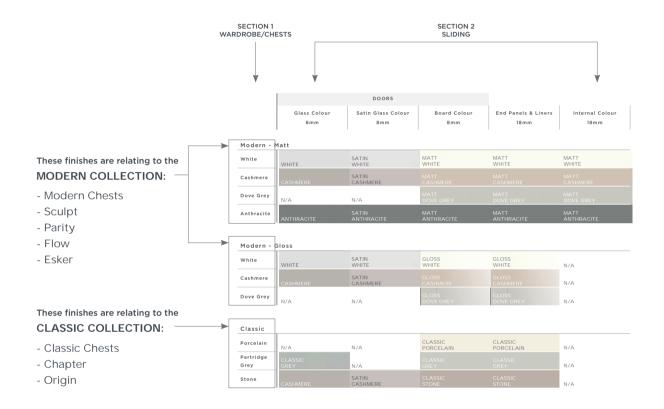

SILVER

SLIDING RANGE TO BOARD MATCH

HOW TO USE THE BOARD MATCH CHART

Whether you are looking for a board match on the sliding collection alone, or would like to see which colour chests or bedframes you can mix with the sliding collection, this sliding board match table should have all the matches you require.

TO MATCH;

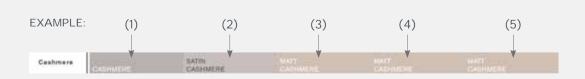

Wardrobe/Chest finishes with sliding finishes.

Use both sections. Use the left column to choose your finish. View horizontally to see which Sliding door finishes, end panels/liners and Internal colours are the best match for your chest finish.

TO MATCH;

Sliding door finishes with end panels and internals.

Only use Section 2 - Sliding. View horizontally to see what recommendations we have to the closest match when choosing your sliding doors and accessories finishes.

If you have chosen a Modern Matt Cashmere Chest, we think the closest colour match to this finish for sliding doors would either be (1) Gloss Cashmere door, (2) Satin Glass finish would be Satin Cashmere or (3) Matt Cashmere board finish. If you were looking for the end panel match for your slider, this would be Matt Cashmere (4), as well as the internal colour (5).

SLIDING RANGE TO BOARD MATCH

	DOORS			
Glass Colour	Satin Glass Colour	Board Colour	End Panels & Liners	Internal Colour
8mm	8mm	8mm	18mm	18mm

Porcelain	N/A	N/A	CLASSIC PORCELAIN	CLASSIC PORCELAIN	N/A
Partridge Grey	CLASSIC GREY	N/A	CLASSIC GREY		N/A
Stone	CASHMERE	SATIN CASHMERE	CLASSIC STONE	CLASSIC STONE	N/A

We do not recommend using gloss or woodgrain colours as internals as they are prone to marking and damage. However these are available should your customer want them.

SLIDING HOW TO MEASURE GUIDE

Follow our measurement guide to accurately complete your order form. To receive an order form please contact the bedroom team by emailing **bedrooms@pws.co.uk** or calling **01325 329 050**

Measure your space

It is very important that you take accurate measurements before ordering your sliding wardrobe.

Use a **spirit level** to check the walls, ceiling and floor is level. *If the floor is very uneven, the doors may slide unintentionally!*

We hope to eliminate any instances where the floor and walls may be slightly out with the liners that the tracks and doors fit too on both the floor and the top of the wardrobe.

MAXIMUM

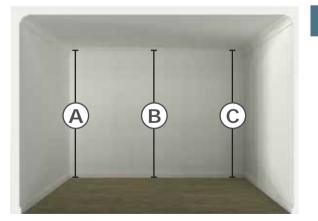

The maximum tolerance we are likely to be able to adjust is 15mm when the walls are not straight. You can have full floor to ceiling sliding doors on any height opening, up to a maximum of 2500mm.

MINIMUM

Our smallest recommended opening width for sliding doors is 1100mm.

WALL TO WALL

Measuring height1AMeasure the height of your opening in at
least three places.Image: Comparing the second s

IMPORTANT: Please always provide us with the smallest measurements

Remember to include factors that may affect the position of your wardrobe such as sockets, switches, window ledges or pipes etc.

Measuring width

WALL TO WALL

It is important to check the walls with a spirit level to see if they bow or curve. Our liners will eliminate any instances up to a maximum of 15mm. If the walls are out by more than this, we will add additional liners or end panels depending on the difference to ensure the opening can be made straight.

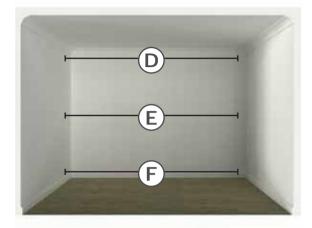

If you have coving and skirting, we will need to remove a section to fit the liner to during the installation

Again, we recommend you measure the width of your opening in at least three places. We recommend measuring the top (D) bottom (F) and from the centre (E)

Please ensure you measure (F) above any skirting board and (D) below any coving that may hinder wardrobe installation.

IMPORTANT: Please always provide us with the smallest measurements

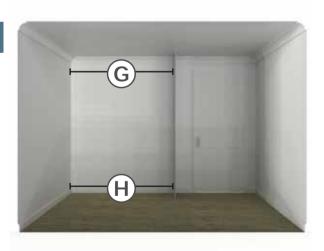

Single end panel

2

If your wardrobe cannot go from wall to wall because of obstructions such as a door, or your room does not require a wall to wall wardrobe you can use an end panel on one end.

We still recommend you measure the width of your opening in at least two places. We recommend measuring the top (G) bottom (H)

IMPORTANT: In the case of wall to end panel measure the dimension from the wall you would like the wardrobe to fix to along to the proposed end where the end panel will be.

1B

MEASURE GUIDE CONTINUED

Double end panel

If your wardrobe cannot go from wall to wall or you do not want to have it fixed to a wall at one side; you can create a free-standing sliding wardrobe in an open space. As long as the back of the wardrobe can fix to a flat wall.

You will need to measure the entirety of the open space you would like to have a sliding wardrobe. (I)

IMPORTANT: provide the maximum width you want your wardrobe to be.

3

4

Angled doors

The most popular configurations of sliding doors are detailed above.

When taking the measurements for an angled sliding wardrobe it is helpful to first draw a sketch of the space. You will need to draw a front elevation and a plan view of the area.

Again, it is important to include factors that may affect the position of your wardrobe such as sockets, switches, window ledges or pipes etc when you draw the space.

The method for measuring will depend on whether you require a single ended angled door wardrobe or a double-ended angled door wardrobe.

5

6

Measuring angled doors - The method

SINGLE ENDED ANGLE DOOR WARDROBE

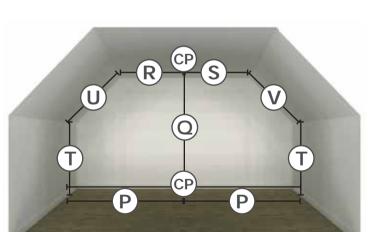

IMPORTANT: remember to measure roughly in the position of the doors, rather than flat to the back wall in case the walls bow or taper.

- (J)Measure the full height from floor to ceiling
- (K) Measure the ceiling width from the wall to the start of the angled slope
- (L) Measure the full width, at floor level, from one wall to the other
- (M)Measure the wall height from the floor to the start of the angled slope
- (N) Measure the length of the angled slope

DOUBLE ENDED ANGLE DOOR WARDROBE

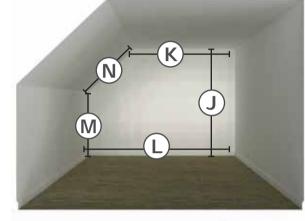

Measure the full width of your aperture along the floor and mark the centre point (CP).

- (O) The overlap on the doors depends of chosen profile and is normally about 35-50mm.
- (P) Add the two floor measurements to either side of the centre point on your diagram.
- (Q) Using a plumb line transfer the centre point at the floor level to the ceiling.
- (R+S) Measure the width of the ceiling from each side of the centre point to the start of the angled slope.
- (T) Measure the height of the wall at each end from the floor to the start of the angled slope
- (U + V) Measure the lengths of the two angled slopes

General Information

The overlap on the doors depends of chosen profile and is normally about 35-50mm.

SLIDING

FRAME OPTIONS

The look you are aiming to achieve with your sliding wardrobe will depend on the frame you may choose. We have five frame types and six frame colours to choose from; some may be easier for you to open than others as each frame type has a different shape. Its best that you take the time to select the frame that is best for you as once selected it cannot be changed.

FRAME PROFILE COLOURS

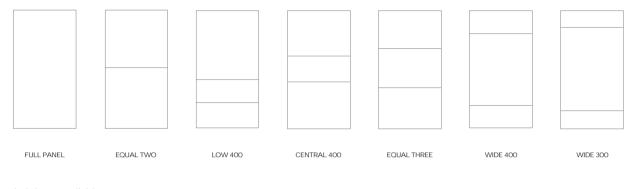

All of your sliding wardrobe doors and tracks will be coloured to match the frame.

DOOR DESIGNS

Truly bespoke in function, we offer seven designs to choose from. You could choose to have all of your doors within one or multiple door designs.

Choosing your desired door design may come hand in hand with choosing how many doors you require; If you would like your wardrobe to look a certain way it may depend on the width of your space determining how many doors you will require. You can choose any mix of door designs within your wardrobe run, with any mix of colours or materials.

Angled doors available upon request.

DOOR COLOURS

Choose from over 35 door colour options ranging from glass, satin glass, mirror, matt, gloss and textured woodgrain boards. Depending on the door design you can mix and match up to three materials.

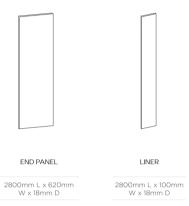

SLIDING ACCESSORIES

END PANELS AND LINERS

In a wall to wall wardrobe we always recommend using 4×1 liners to create a finished edge for the doors to run into. These also help to disguise imperfections where walls, floors and ceilings are uneven.

End panels are great to use if you don't have a wall to wall space, or to reduce the height left at the top of the wardrobe in instances with high ceilings.

COLOURS FOR END PANEL OR LINERS

SLIDING INTERNALS

SHELF AND HANGING RAIL

The shelf and hanger rail provides a practical standard hanging solution.

It can be used individually or as multiples, combined together with the use of an end panel between for larger widths; additionally to this you could use end panels to create shelves.

The shelf is supplied at a 2800mm (width) x 620mm (depth) and comes with two baton lengths for support. It is important to note that the maximum length of a hanging rail is 2500mm. The hanging rail comes with a central vertical support, two end brackets and two ceiling fixture supports as standard. Please speak to a member of our team for further information on alternative options.

COLOURS FOR SHELF AND HANGING RAIL

We do not recommend gloss panels for shelves and hanging rails as they are more likely to scratch and mark.

Additional hanging rail end brackets and central bracket for vertical supports are available on request.

HOW TO CALCULATE YOUR DRIVERS

- Required to power Sensio 12V and 24V light fittings.
- To simplify the process of selecting the appropriate driver for your lighting requirements, Sensio use a simple colour coding system. The cable on the light fitting, the distributor block on the driver and the outer packaging for each product all carry a colour coded label.
- All drivers in this section are colour coded. Refer to the product table to find the colour that is correct for your lights.
- Each drivers main cable is 1.5m.

How to select the right driver for your lights:

 Each driver can run a number of lights. Simply divide the wattage of the driver by the wattage of a single light and this will tell you exactly how many lights can be run by the driver.

Example: 15W driver with 3W lights 15 / 3 = 5 lights

 Sensio drivers are available in various wattages. Simply work out the best option dependent on the number of lights you have.

Note: Drivers have a limited number of ports to connect your lights to. A driver with 12 ports is therefore limited to a maximum of 12 lights.

24V/6W LED DRIVER with 4 Port JB4 Distribution Block

- This electronic LED converter is exclusively designed for LED products which are to be used indoors
- The electronic converter has a switch mode power supply with 24 VDC constant output voltage
- An electronic protection circuit switches off the electronic converter in case of a short circuit or overload in the secondary circuit, overheat as well as open circuit

ADJUSTABLE LEGS & SOCKETS

One-piece or two-piece legs

• One-piece legs offer the most economical system. However, using a separate fixing socket gives considerable handling advantages.

Which fixing system?

- Bolt fix or screw fix for low/medium level production
- Dowel fix for large scale production

Plastic, steel, or decorative legs?

- · Plastic legs are economical and strong
- Steel legs are more suitable for heavy duty applications - use with steel fixing sockets
- Decorative legs are used where no plinth is used

Which height?

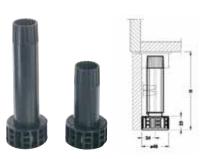

• 150mm for kitchens, 100mm for bedrooms. 140mm are available for special circumstances (e.g. uneven flooring)

End panel support

• All the sockets & leg fixings are designed to overlap the base/end panel joint, reducing joint loading

the art of innovation

SERIES 450 Plastic

Adjustable	leg	plastic
------------	-----	---------

- Foot Ø: 48mm
- Leg height: 100mm or 150mm
- Adjustment range -5mm, +20mm
- Bulk packs of 2000 available

Socket compatibility: Plastic only

Order code	Description

B840 00 P2 H5 00 Bolt or screw fix, 58x65mm, plastic

BOLT/SCREW FIX SOCKET Plastic

- Fix using 10mmØ, bolt or 4x4mm chipboard screws (not supplied)
- Bolt fixing allows adjustment from inside or outside of the base unit
- Dimensions 60x60mm .
- End panel support
- For quantities, please refer to the price list

Order code	Description
BDNO	Single bolt/screw fix socket

PLINTH CLIPS

Plinth Clips

- 24mm offset should be used when the leg is required to give end panel support. The plinth should be rebated to avoid a gap between the gable panel and plinth
- To fit the leg in this way the centre leg should be positioned 24mm from the edge of the base panel (assuming the plinth and the gable panel are the same thickness and the plinth rests flush with the gable). If the leg is to support the base panel only, the centre of the leg should be at least 30mm from the base end panel edge
- A 30mm offset plinth clip can be used to bring the plinth flush with the gable panel (no rebate required) or a 24mm offset clip with the plinth by 6mm

Adjustment

- Hollow bolt fixing allows leg adjustment from the inside of the carcase, making carcase levelling easy
- Screw or dowel fixing also allows internal adjustment by drilling a 10mm hole centrally over the leg and plug with a 10mm plug cap

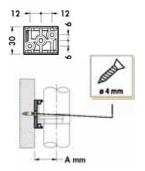

Hidden mounting

• Cover caps are visible from the inside of the carcase, however screw or dowel fixing methods are unseen when installed with no internal adjustment

SERIES 228 Steel and plastic

- Adjustable plinth clip
- Height: 30mm
- Offset: 24mm
- Fixing: screw fix, 3mm x 4mm chipboard screws (not supplied)
- For quantities, please refer to the price list

Leg compatibility: 350, 418, 415, and 450 series

Order code	Description

AVENTOS HK-XS LIFT MECHANISM

AVENTOS HK-XS

AVENTOS HK-XS is a compact lifter for wall cabinets. Thanks to the narrow style, **AVENTOS HK-XS** offers a high level of design freedom.

AVENTOS HK-XS proves itself with the familiar AVENTOS quality of motion. Stay lifts open and close with seemingly weightless movement. They close silently and effortlessly in combination with CLIP-TOP BLUMOTION hinges.

- Specifically for small top wall cabinets or those with low internal depths
- Symmetrical lift mechanism, can be used on one or both sides for heavier frontals.
- Silent and effortless closing, thanks to BLUMOTION
- Stops at any opening position
- · Easy assembly and adjustment

BLUMOTION	
By Blum

This document has been designed to help you familiarise yourself with the correct product to use in all scenarios, as featured in our brochures when using Kindred complete or component stocked product.

We have tried to explain every situation you may come across when planning a space; whether it's a simple run or something a little more complex.

If you encounter something difficult to plan that we have not covered please call your representative to speak direct with someone who can help.

'HOW TO' PLAN YOUR DESIGN - HINGED COMPLETE COLLECTION

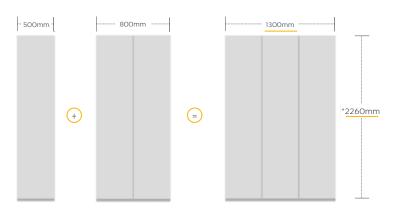

MEASURE YOUR SPACE

Ensure you are fully equipped to start designing. The bedroom planning paper prompts things you need to think about when measuring a space including:

✓ Sockets ✓ Switches ✓ Window ledges etc

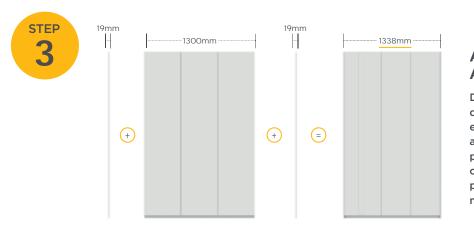

STEP

CREATE A WARDROBE RUN

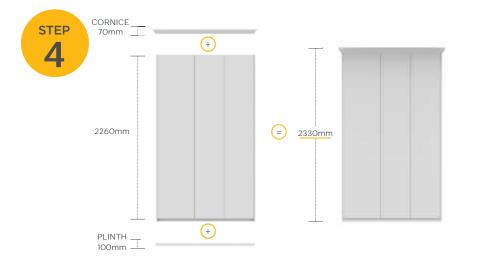

Although our wardrobes are rounded numbers sometimes the cabinets can creep in size. Please remember a tolerance of + / - 1mm per wardrobe when planning a design; especially if the wardrobe run is to go wall to wall.

Please allow 1mm + / - per wardrobe

ADD END PANELS AND FILLERS

Depending on whether your design is wall to wall or open ended you will need to add either an end panel or a custom fit plinth to cover the linen coloured cabinet. For advice on what product to choose please see our next section.

ADD CORNICE & PLINTH

You will always need to use a length of plinth to cover the structural base of the wardrobe and depending on whether your design has the space you can either add a cornice or an infill to ceiling to finish off the display.

STEP 5

ADD YOUR INTERNALS

Depending on the storage requirements we have multiple internal storage options for our wardrobes. You can choose from predetermined bundles or get creative and design your own. Please refer to section 2 for our full internals section.

IS IT GOING UP AGAINST A WALL?

FLUSH

If your wardrobe run is going up against a wall you can use a length of plinth to give the same effect as an end panel without wasting unnecessary product.

CLASSIC

PRODUCT NAME	DIMENSIONS
Moulded plinth	3050mm L x 100mm H x 25mm D
Classic plinth	3050mm L x 100mm H x 19mm D
Custom fit plinth	3050mm L x 160mm H x 19mm D

PRODUCT NAME	DIMENSIONS
Plinth	3050mm L x 36mm H x 19mm D
Custom fit plinth	3050mm L x 160mm H x 19mm D

WITH GAP

If your wardrobe is going up against a wall but has a gap larger than 19mm; you can choose whether to make a filler from any of the following items.

CLASSIC

SIZE FILLER	PRODUCT NAME	DIMENSIONS
Up to 36mm	Moulded plinth	3050mm L x 100mm H x 25mm D
Up to 100mm	Classic plinth	3050mm L x 100mm H x 19mm D
Up to 160mm	Custom fit plinth	3050mm L x 160mm H x 19mm D
Up to 650mm	End panel	2400mm L x 650MM W x 19MM D

Up to 650mm	End panel	2400mm L x 650MM W x 19MM D

7.07

DO YOU HAVE AN OPEN END?

If your wardrobe has an open end you will need an end panel or custom fit plinth to cover the full visible depth of the wardrobes and any voids at the back.

FULL DEPTH

To cover the full depth of the wardrobe and any voids at the back, it's best to use an end panel.

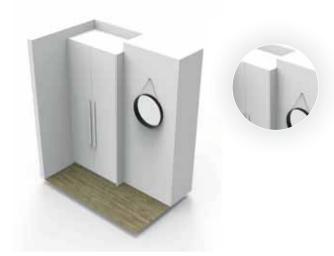

CLASSIC

PRODUCT NAME	DIMENSIONS
End panel	2400mm L x 650MM W x 19MM D

MODERN

PRODUCT NAME	DIMENSIONS
End panel	2400mm L x 650MM W x 19MM D

INFILL PLINTH

To cover smaller depths into alcoves or between other objects choose from below:

CLASSIC

SIZE FILLER	PRODUCT NAME	DIMENSIONS
Up to 36mm	Moulded plinth	3050mm L x 100mm H x 25mm D
Up to 100mm	Classic plinth	3050mm L x 100mm H x 19mm D
Up to 160mm	Custom fit plinth	3050mm L x 160mm H x 19mm D
Up to 650mm	End panel	2400mm L x 650MM W x 19MM D

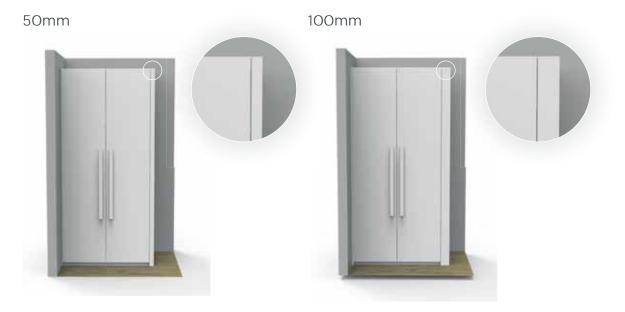

MODERN

SIZE FILLER	PRODUCT NAME	DIMENSIONS

Up to 650mm	End panel	2400mm L x 650MM W x 19MM D

DO YOU WANT TO ADD A FEATURE POST?

You can use a feature post to create a detail on the end of a wardrobe run. It can be up against a wall or on an open end. It can also be 50mm or 100mm facing depending on your preference and overall width.

MODERN

FEATURE POST DETAIL; END PANEL FLUSH OR PUSHED BACK?

If the wardrobe run has an open end you can choose whether to put the end panel flush with the back of the feature post or push it back level with the recess on the reverse of the feature post to create additional detail.

MODERN

Flush

Pushed back

CLASSIC

Flush

Pushed back

WHAT PLINTH DO YOU NEED?

You will always need a plinth to cover the structural base of the wardrobes. Depending on whether you want to achieve a specific look or whether the floor runs out we have multiple options of plinth to choose from.

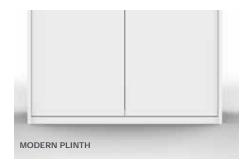

CLASSIC

The classic plinth is a simple design with a small edge detail that can be used in all scenarios.

The moulded plinth is slightly more decorative for a more classic look. It is also slightly thicker in depth.

CLASSIC PLINTH OPTIONS		
Moulded plinth	3050mm L x 100mm H x 25mm D	
Classic plinth	3050mm L x 100mm H x 19mm D	
Custom fit plinth	3050mm L x 160mm H x 19mm D	

*as you can see the moulded plinth requires the return of the plinth around the wardrobe and the end panels cut to sit on top are to plinth thickness.

MODERN

Both modern plinths give the same look aesthetically, the difference is only that the custom fit plinth can be cut in height if the floor runs out of level.

MODERN PLINTH OPTIONS		
Plinth	3050mm L x 36mm H x 19mm D	
Custom fit plinth	3050mm L x 160mm H x 19mm D	

DO YOU NEED A CORNICE?

Depending on what look you want to achieve or what height you have remaining we have various cornice options.

CLASSIC

If you would like to take a contemporary approach to the classic collection we recommend using the feature post or classic cornice. Although the classic cornice is a traditional shape it has a very linear design.

For a more ornate feature we would recommend the moulded cornice with a swallow neck profile.

CLASSIC CORNICE OPTIONS		
Feature post	3050mm L x 50mm H x 100mm D	
Classic cornice	3050mm L x 66mm H x 76mm D	
Moulded cornice	3050mm L x 70mm H x 109mm D	

CLASSIC Cornice

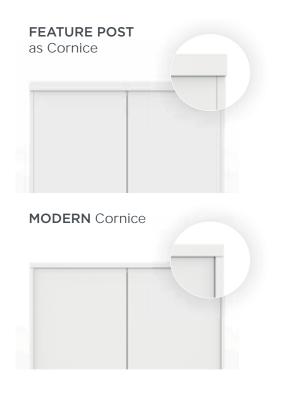

MODERN

For a simple contemporary look we suggest the modern cornice, or for more of a statement we suggest the feature post as cornice.

If you want to create an ultra contemporary look you could leave the cornice off altogether.

MODERN CORNICE OPTIONS		
Feature post 3050mm L x 50mm H x 100mm D		
Cornice	3050mm L x 28mm H x 50mm D	

WHAT IF YOU DON'T HAVE THE CORRECT HEIGHT FOR A CORNICE?

If you have not got the full height needed to use a modern or classic cornice you have the option to use either a modern or classic plinth as cornice instead.

CLASSIC

When using either the classic plinth or custom fit plinth as cornice you will achieve the same aesthetical appearances. The difference will be in the height of the product remaining to fix it to the wardrobe. However, if you use the moulded plinth as cornice you have the option to use the scalloped edge detail on the plinth to create a feature around the wardrobe run as shown above.

25*mm*

MODERN	19mm
	You can use either of the modern plinths for the same aesthetical appearances. The difference will be in the depth of the product remaining to fix it to the wardrobe.

SIZE FILLER	PRODUCT NAME	DIMENSIONS
25mm	Moulded plinth	3050mm L x 100mm H x 25mm D
19mm	Classic plinth	3050mm L x 100mm H x 19mm D
19mm	Custom fit plinth	3050mm L x 160mm H x 19mm D

SIZE FILLER	PRODUCT NAME	DIMENSIONS
19mm	Plinth	3050mm L x 36mm H x 19mm D
19mm	Custom fit plinth	3050mm L x 160mm H x 19mm D

WHAT IF YOU WANT TO INFILL TO CEILING?

If you do not want to use cornice but you also do not want a gap at the top of your wardrobe you can infill to the ceiling. Depending on the size of the gap we have varying products that can be used.

HEIGHT REMAINING	PRODUCT NAME	DIMENSIONS
Up to 100mm	Classic plinth	3050mm L x 100mm H x 19mm D
Up to 160mm	Custom fit plinth	3050mm L x 160mm H x 19mm D
160+mm	End panel	2400mm L x 650mm H x 19mm D

HEIGHT REMAINING	PRODUCT NAME	DIMENSIONS
Up to 100mm	Custom fit plinth	3050mm L x 160mm H x 19mm D
100mm +	End panel	2400mm L X 650mm W X 19mm D

DO YOU WANT A FEATURE POST INSTEAD?

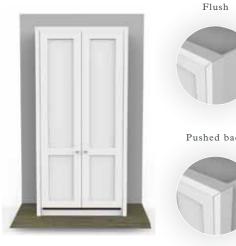

You can create a decorative feature around the wardrobes by using a Passepartout.

When using a feature post to create a Passepartout around the wardrobe run, you can choose to either mitre or butt joint the posts in the corners.

If the Passepartout is on an open end, you then have the option of putting the end panel flush with the back of the feature post, or pushed back in line with the recess at the back of the post.

DO YOU HAVE ADDITIONAL HEIGHT?

If you have a ceiling height of 2710mm or above you can use feature storage units on top of wardrobes to fill the additional height.

Wardrobe2260mmFeature storage unit450mm

FEATURE STORAGE UNIT WITH CORNICE

Following that you can then use cornice, infill straight to the ceiling or create a feature with an additional section between the wardrobes and the feature storage units. To see how this works please see the next pages.

CLASSIC

HEIGHT REQUIRED	PRODUCT USED
2780mm	Wardrobe, feature storage unit & moulded cornice
2776mm	Wardrobe, feature storage unit & classic cornice
2760mm	Wardrobe, feature storage unit & feature post

MODERN

HEIGHT REQUIRED	PRODUCT USED
2746mm	Wardrobe, feature storage unit & cornice
2760mm	Wardrobe, feature storage unit & feature post

FEATURE STORAGE UNIT WITH INFILL

CLASSIC

MODERN

WHAT IF YOU HAVE EVEN MORE HEIGHT

If you have an even taller ceiling height there is an option to add in an additional feature by using a length of plinth or feature post between the feature storage unit and the wardrobes before adding a cornice or infill to ceiling.

INFILL BETWEEN ROBE AND FEATURE STORAGE UNIT

CLASSIC

The classic collection has a lot more variation due to the varying heights between the classic and moulded cornice and plinth options. Please be aware of the height you have available when selecting the best solution for your design.

HEIGHT NEEDED	PRODUCT USED
2799mm	Wardrobe, feature storage unit, moulded cornice & classic plinth
2805mm	Wardrobe, feature storage unit, moulded cornice & moulded plinth
2795mm	Wardrobe, feature storage unit, classic cornice & classic plinth
2801mm	Wardrobe, feature storage unit, classic cornice & moulded plinth
2826mm	Wardrobe, feature storage unit, classic cornice & feature post (50mm facing)
2830mm	Wardrobe, feature storage unit, moulded cornice & feature post (50mm facing)

MODERN

HEIGHT NEEDED	PRODUCT USED
2757mm	Wardrobe, feature storage unit, cornice & plinth (19mm facing)
2774mm	Wardrobe, feature storage unit, cornice & plinth (36mm facing)
2788mm	Wardrobe, feature storage unit, cornice & feature post (50mm facing)

HOW TO CHOOSE THE CORRECT PLINTH FOR A CORNER WARDROBE

When choosing the correct plinth for your wardrobe you must decide how you would like it to look first as each plinth may have a different application.

CLASSIC

MOULDED Plinth

When using the moulded plinth with a corner wardrobe you will need to remember that the corner post will need to be cut to the height of the doors so the plinth can sit beneath it.

The plinth should also be return mitred around the wardrobe with the end panel cut to the length of the doors and sat on top of the plinth. This is due to the thickness of the plinth – If you did not want to return mitre the plinth around the wardrobe you would need to pull the end panels forward – proud of the doors to cover the cut end of the plinths as the plinth is 25mm thick.

CLASSIC Plinth

When using the classic plinth you do not need to cut the corner post to the height of the door.

You can fit the corner post all the way to the floor and the classic plinth will run flush into it. You also do not need return mitre the plinth around the wardrobe as it will sit inside the end panels when fitted normally.

MODERN

MODERN Plinth

When using the modern plinth you do not need to cut the corner post to the height of the door.

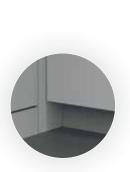

You can fit the corner post all the way to the floor and the plinth will run flush into it. The plinth will also sit inside the end panels when fitted normally.

DO YOU USE A PLINTH WITH THE STABLE ROBE?

When designing with a stable robe you have an additional option to finish the front of the run with an additional piece of plinth.

MODERN

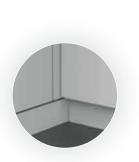

The stable robe is designed with a blanking panel that runs directly into the floor that allows you to push a modern chest into it. When the blanking panel runs to the floor and the chest is pushed into it the modern chest will have slight shadow gap beneath it.

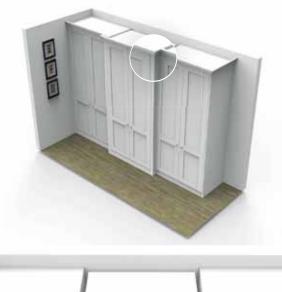

If you want to avoid the shadow gap at the bottom you can cut the blanking panel to the height of the door next to it and run the wardrobe plinth the full length of the run. You can then use a length of plinth under the modern 4 drawer chest up to the plinth on the wardrobe run and any gaps in the corner of the stable robe will now be hidden.

HOW TO DO A BREAKFRONT

If you want to create an additional design feature within the bedroom run, a popular feature is to create a breakfront with feature posts.

CLASSIC

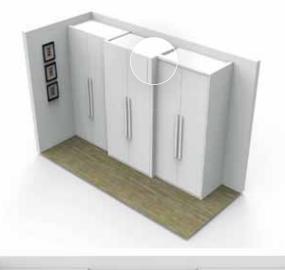

TO CREATE A BREAKFRONT YOU REQUIRE:

2X FEATURE POSTS
2400mm for standard wardrobe height
3050mm for wardrobes with top boxes

The most efficient way to create a breakfront is to use the post 50mm facing.

This allows you to pull the 'feature' wardrobes up to 100mm forward from the wardrobes on the back wall.

To ensure stability of the breakfront we suggest you baton the back of the wardrobe to the wall or; before placing the base into the wardrobe, baton to the floor which can then be hidden under the wardrobe base. MODERN

HOW TO CREATE A 'FLOATING' SHELF

To add an additional storage feature you can create a 'floating' shelf. These consist of a selection of feature posts as the front and two pieces of end panel, top and bottom enclosing the feature post giving it a 'chunky' appearance.

CLASSIC and MODERN

TO CREATE A FLOATING SHELF YOU WILL NEED:

 QUANTITY DEPENDANT ON SHELF WIDTH + DEPTH

 Feature post 2400 or 3050 - depending on length

 End panel or custom fit panel - depending on colour

When working out your quantities please remember that you will need a piece of end panel for both the top and bottom of the reverse of the feature post - we call this double skinning the shelf.

HOW TO INTEGRATE CHESTS INTO A WARDROBE RUN

CLASSIC

PUSHED BACK PULLED FORWARD

PUSHED BACK

Pushing the chest back will require the removal of the chest plinth to allow the piece to integrate seamlessly – this will need to be replaced with the same plinth that is used on the wardrobe run. To do this you will need to raise the chest on blocks or adjustable feet to the same height as the wardrobe plinth. (Not supplied)

The chest top with coving detail will still work when integrated but will need adjusting on the sides to remove the mitre return and scalloped edge profile.

PULLED FORWARD

OAK TOP

Pulling the chest forward will also require the removal of the chest plinth to allow the piece to integrate seamlessly – this will need to be replaced with the same plinth that is used on the wardrobe run but will now run completely across the front. To do this you will need to raise the chest on blocks or adjustable feet to the same height as

the wardrobe plinth. (Not supplied)

The chest top with coving detail will no longer work; and will require a panel to create a top. The panel should then sit between the two end panels used on the sides of the wardrobes for a fully fitted look.

COLOUR MATCHED

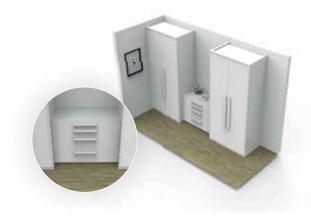

When pulling the chest forward and if you require a colour matched top you will need an additional panel in the colour of choice. You then have the option to reduce the width by 36mm

by sitting the top under the end panels used on the sides of the wardrobe. However you could still follow the application shown above if you have the width.

MODERN

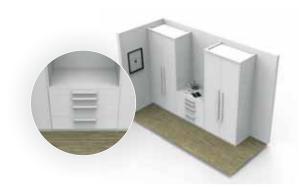

PUSHED BACK

There will be no changes required if you push the chest back and it will fit seamlessly between the two end panels on each side of the wardrobes. It is best to be aware of the drawers when fitting to ensure they will still open.

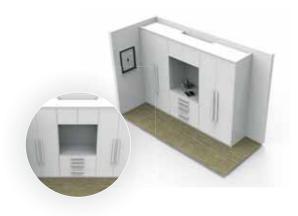

There is an option to cover the structural plinth of the chest with the 36mm modern plinth to remove the shadow gap at the bottom.

PULLED FORWARD

NO TOP BOXES

Pulling the chest forward will require an additional end panel on the top of the chest to cover the void the back. If you are not using top boxes you can reduce the width by 36mm by sitting the top of the chest under the end panels used to cover the gables on the sides of the wardrobes and then continuing the wardrobe plinth all the way across the front of the wardrobe run.

WITH TOP BOXES

If you are using top boxes whilst integrating a chest you will need to sit the chest inside the end panels on the sides of the wardrobes - and then continuing the wardrobe plinth all the way across the wardrobe run, rather than setting the chest 36mm closer and under the end panels on the sides of the wardrobe. This is to allow for the top box width. Additionally if pulling the top boxes forward flush with the chest you will require a panel for the underside of the top boxes.

CREATING A CUSTOM FIT DESK

CLASSIC

OPEN END

When using the classic custom fit desk with an open end you have up to a length of 2400mm and a depth of 488mm with no changes. If you require the desk to be deeper you will need to consider over panelling the back of the chest to cover the gap made when you pull the chests off the wall, but you will also need to change the plinth.

AGAINST A WALL - No change

When using the classic custom fit desk against a wall. You have up to a length of 2400mm and a depth of 488mm with no changes. However due to the chest plinth detail you will end up with a small gap against the wall. To remove the gap please see the swapped plinth option below.

Again if you require the desk to be deeper you will need to consider over panelling to cover the gap at the back of the chest, but you will also need to change the plinth.

AGAINST A WALL - Swapped plinth

When using the classic custom fit desk against a wall without a gap you will need to remove the existing chest plinth and raise the chest on blocks or feet and swap the plinth to the same as what is being used on the rest of the wardrobes. You have up to a length of 2400mm and a depth of 488m for the chest top. (The blocks/feet are not supplied)

Again If you require the desk to be deeper you will need to consider over panelling to cover the gap at the back of the chest.

MODERN

OPEN END

To create a modern desk with an internal stackable drawer and an open end you need to order additional products to make a structural and supporting leg.

By using a feature post (50mm facing) and cladding, the back of the post with end

panels, will create an independent and solid leg you can then fix the drawer runners to. The opposing side will fix directly into the end panel on the gable end of the wardrobe. You then have the option of using a colour matching or contrasting top for the desk top. Bear in mind the modern collection does not have edging tape so finished edges will need to be used where can be seen.

To create a modern desk with an internal stackable drawer against a wall you need to ensure you have the correct fixings for the type of wall you are fixing to. If the wall is plasterboard we recommend using the batons and filler strips that come with the stackable drawer to fix to the walls - the widths of these drawers are as follows.

STACKABLE DRAWER	DRAWER WIDTH DIMENSION
500 stackable drawer + fillers	464mm
800 stackable drawer + fillers	764mm
900 stackable drawer + fillers	864mm
1000 stackable drawer + fillers	964mm

If you have a brick wall you have the option of removing the batons and filler strips and fitting the drawer flush to the wall. -the widths of the drawers without the fillers are as follows.

STACKABLE DRAWER	DRAWER WIDTH DIMENSION
500 stackable drawer	414mm
800 stackable drawer	714mm
900 stackable drawer	814mm
1000 stackable drawer	914mm

AGAINST A WALL - With Feature Storage Units

To create a modern desk with an internal stackable drawer against a wall with feature storage units above – your width will be determined by the size of the feature storage units you are using. Because feature storage units are external widths and the stackable drawers are designed for internal widths (inside wardrobe cabinet) you will need to remember to order something to make the larger fillers for either side of the drawers.

DIFFERENT USES FOR FEATURE STORAGE

BRIDGING UNIT

CLASSIC or MODERN

PUSHED BACK

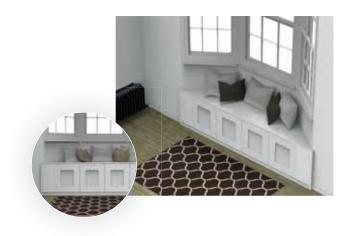

When pushing the feature storage units back between two wardrobes you must remember that if you are using a cornice you will need to allow for the cornice around the wardrobes and the feature storage units, and also include end panel on the underside.

PULLED FORWARD

When pulling the feature storage units forward flush with wardrobes, the cabinets will need to be battened to the wall for stability. In this case the cornice will run along the front of the wardrobes in a straight run and will still require an end panel on the underside.

WINDOW SEAT

CLASSIC

To create a window seat in the classic collection you will need to divide the width by the amount of storage boxes required or that will fit. You may need to create fillers from end panels for additional width that will not work with our door sizes. To modify the cabinets to suit any shape, remember to order a linen panel to modify the robe. We have also raised the feature storage units from the floor on blocks and used a 100mm plinth to match the classic wardrobe collection.

MODERN

To create a window seat in the modern collection you will need to divide the width by the amount of storage boxes required or that will fit. You may need to create fillers from end panels for additional width that will not work with our door sizes. To modify the cabinets to suit any shape remember to order a linen panel to modify the robe. We have also raised the feature storage units from the floor on blocks and used a 36mm plinth to match the modern wardrobe collection.

In both instances we recommend that for the top of the window seat, you employ a professional upholsterer to create you a bespoke seat pad to fit the size, density and fabric options to suit your requirements.

DIFFERENT USES FOR FEATURE STORAGE

MEDIA UNIT AGAINST ROBES

CLASSIC

To create a media unit on the floor in the classic collection you have the option to create the top in either a colour matched panel or custom fit oak top. In the visual shown we put the finished edges to the front and side and cut edges to the wall and against the wardrobe. We have also raised the feature storage units from the floor on blocks and used a 100mm plinth to match the wardrobes. (Blocks are not supplied)

MODERN

To create a media unit on the floor in the modern collection you will need to remember that the modern collection does not have a matching edging tape. In the visual shown we put the finished edges to the front and side and cut edges to the wall and against the wardrobe. We have also raised the feature storage units from the floor on blocks and used a 36mm plinth to match the wardrobes. (Blocks are not supplied)

MEDIA UNIT STAND ALONE

CLASSIC

To create a media unit on the floor in the classic collection you have the option to create the top in either a colour matched or oak end panel or using the custom fit tops with the scalloped coving profile. In the visual shown we have used a custom fit top with scalloped coving profile. We have also raised the feature storage units from the floor on blocks and used a 100mm plinth to match the classic wardrobe collection. (Blocks are not supplied)

MODERN

To create a media unit on the floor in the modern collection you will need to remember that the modern collection does not have a matching edging tape. In the visual shown to create a top we have used modern 36mm plinth to create a frame and then sat the cut panel inside to create a finished edge. We have also raised the feature storage units from the floor on blocks and used a 36mm plinth to match the modern wardrobe collection. (Blocks are not supplied)

STAND ALONE DRESSING TABLE

MODERN

If you want to create a stand alone dressing table you can use the same method as the modern stackable drawer desk but to make it fully free standing you will need to duplicate the leg on both sides.

You need to remember that the width of the dressing table will be determined by the size of the stackable drawer you are using. Because the stackable drawers are designed for internal widths (inside wardrobe carcass) that the drawer front sizes are not standard.

You **do not** need to use the fillers that come with the stackable drawer, as the runners can fix to the new legs.

If you do not use this fillers the widths will be as follows.

DESCRIPTION	DRAWER WIDTH DIMENSION	OVERALL WIDTH
500 stackable drawer without fillers	464 mm	564 mm
800 stackable drawer without fillers	764mm	864mm
900 stackable drawer without fillers	864mm	964mm
1000 stackable drawer without fillers	964mm	1064mm

If you want your free standing dressing table to equal an even width you will need to use the fillers either side of the drawer.

PUTTING 2 CHESTS TOGETHER

CLASSIC

If you want to put 2x classic 2 + 2 chests together you can make them look like one complete unit by using a custom fit top and moulded plinth.

To join 2x classic chests together you will need to fully remove both of the structural plinths from the free standing chests and replace them with a length of moulded plinth. You may need to raise the chests on blocks in order to do this as the chests do not have additional feet.

You will also need to fully remove both chest tops and replace them with a custom fit top in either oak or colour matched to your chest. The top will require some custom work with the coving profile and edge banding.

*It may help to also take the chests flat-packed)

PRODUCT REQUIRED
1x custom fit top
1x moulded plinth
1x coving profile (additional)

If you want to avoid having a joint line between the two chests you can remove the two chest edge pieces that will be side by side and replace with one piece of cut colour matched end panel. Please note the panel will need to be edged with matching edging tape as it will be seen when the drawers are opened.

*It may help to also take the chests flat-packed)

MODERN

If you want to put 2x modern 4 drawer chests together you can make them look like one complete unit by using end panel and plinth.

You will need to put 2 cut pieces of end panel down each side of the modern chest – Finished edge to the front and also a finished edge 19mm higher than the top of the chest.

A piece of end panel can then be used to create a top which will sit inside the two raised edges of panel used on the ends of the chest. This will cover any cut panel edges – however you will need a finished edge to the front of the chest.

A length of plinth can then be ran across the front of the chests to hide any joins on the base.

PRODUCT REQUIRED	
1 x Plinth	
2 x End panels

WARDROBE CABINET SPECIFICATION

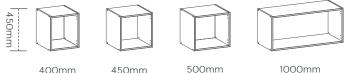

WARDROBE CABINET SIZES:

- 18mm Chipboard
- 2260mm high (including structual plinth 100mm_
- Cabinet depth 610mm (internal 558mm, void at back 22mm)
- Depth of internal space 560mm
- Total depth including stocked door 610mm
- Widths: 400 / 450 / 500 / 800 / 900 / 1000mm
- Cabinet finish in foil wrapped textured linen effect (bespoke to PWS)
- 1 x 22mm thick matching textured linen shelf set at 278mm from the top of the cabinet
- 1 x brushed bronze effect hanging rail
- 8mm linen effect back panel (clear silicone joint on reverse face of 800 / 900 & 1000mm back panels)
- 4 x Metal height adjustable feet
- · Vertical and horizontal assembly options
- CONFIRMAT screws with dowel construction
- · Cabinets pre-drilled for hinge plates / shelving / hanging rails / internal stackable drawers from stocked selection
- Wardrobes come in 3 packs:
- Pack 1 2 x 18mm end panels

Pack 2 - Wardrobe width pack: Top shelf, base & plinth 3 x cross rails for back panel, 1x brushed bronze hanging rail plus all fittings Pack 3 - Wardrobe back panel: 8mm

WARDROBE CABINET SPECIFICATION

WARDROBE CABINET BREAKDOWN:

SINGLE / DOUBLE WARDROBE CABINET

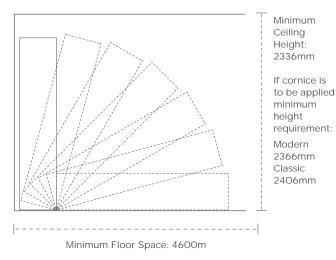

CORNER WARDROBE CABINET

ASSEMBLY OF ROBE:

Before assembling the wardrobe cabinets, it is essential that the overall room height and floor space is determined. Horizontal assembly requires a minimum ceiling height of 2336mm and a minimum floor space (Length) of 4600mm in order to insert the back panel. If you are assembling in a small space, it is recommended that you follow the vertical assembly instructions providing you have a minimum ceiling height of 2300mm. Horizontal and vertical assembly guidelines can be found in the assembly instructions.

HORIZONTAL ASSEMBLY:

Horizontal assembly requires a clearance of 76mm in order to lift the wardrobe into an upright position. If cornice is to be applied, additional ceiling height is required depending on cornice style.

VERTICAL ASSEMBLY:

Minimum Ceiling Height: 2300mm If cornice is to be applied minimum height requirement:

2330mm Classic

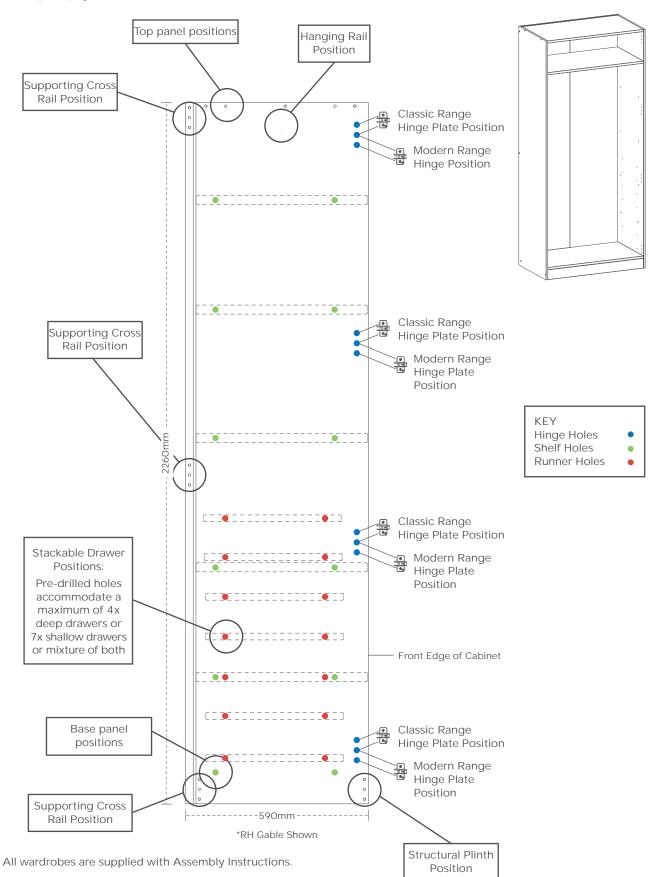

2350mm

Vertical assembly requires an additional ceiling height clearance of 30mm for Modern cornice and 50mm for Classic cornice.

ALL PRE-DRILLED HOLES

All wardrobe cabinets (single and double) have the same side panel dimensions and drilling positions. Wardrobe cabinets are pre-drilled with 3mm diameter holes for internal pre-drilled holes that suit a variety of functions.

The below diagram illustrates the hole position with details of each function, please refer to key below. Subsequent pages contain details with critical dimensions relevant to each function

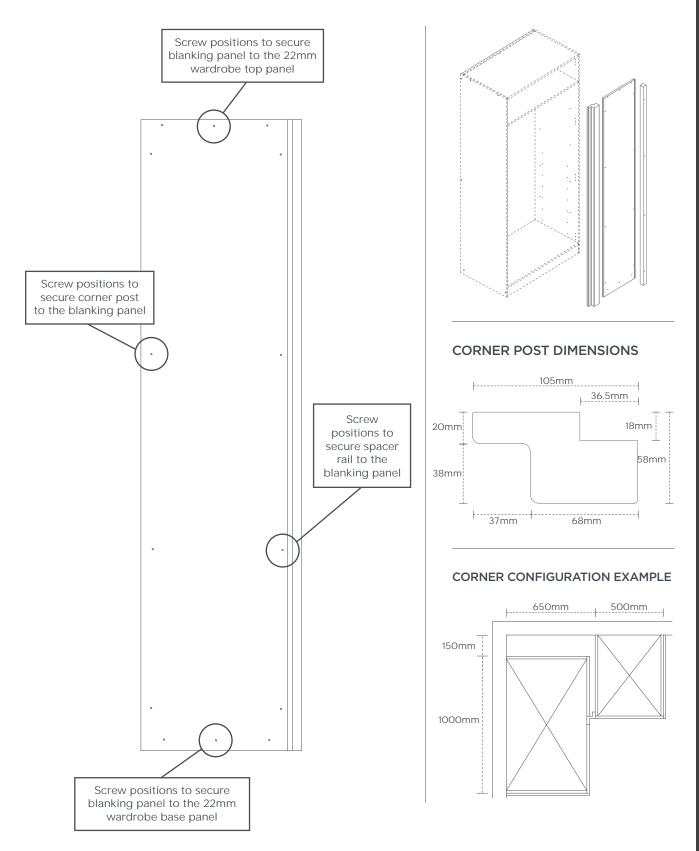

CORNER CABINET FIXING POSITIONS

The blanking panel supplied with a corner wardrobe conversion kit comes pre-drilled for fixing.

The door supplied with a corner wardrobe bundle is drilled to fix to the wardrobe carcass - not the corner post

The corner post is fixed.

The spacer rails are also pre-drilled to align with the drilling positions on the blanking panel. The blanking panel is not handed and can therefore be flipped to accommodate left and right hand scenarios.

- Small drawer takes 11kg load capacity
- · Large drawer takes 23.8kg load capacity
- · Strengthening metal strip on underside of top

SLIDING WARDROBE SPECIFICATION

TECHNICAL INFORMATION

Within this sliding wardrobe specification section you can find the key information needed when installing a sliding wardrobe. If you require any additional information please speak to a member of the bedroom team for our full installation guide.

CONTENTS

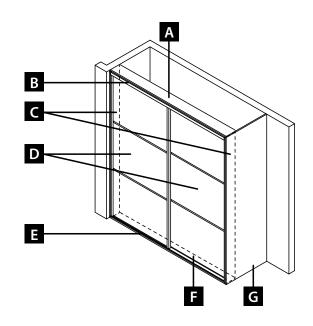

- Sliding wardrobe information47- Overview47- Adjustment47- Soft close quantity options47
 - Fixing the door positioners 48
 - Positioner dimensions48

SLIDING WARDROBE INFORMATION

OVERVIEW

Typical Sliding Wardrobe Door Layout

- A Top Liner
- B Top Track
- C Liners
- D Sliding Doors E Bottom Track
- E Bottom Irac
- F Bottom Liner
- ${\bf G}$ End Panel (optional depending on design)

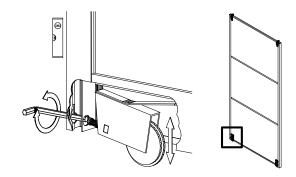

ADJUSTMENT

Bottom roller

The bottom roller can be adjusted using the allen key provided by turning the adjustment bolt through the hole in the side profile.

- To move the doors down turn anti-clockwise
- To move the doors up turn clockwise
- After adjustment, plug the hole with the plastic hole covers provided.

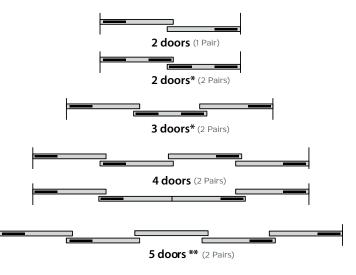

SOFT CLOSE QUANTITY OPTIONS

Soft close mechanisms will come fitted to the top of your doors. You can choose how many soft close pairs you require depending on how many doors are in your design.

Each mechanism requires a liner, wall or end panel to work against.

The maximum number of doors possible in a two-track arrangement using soft closers is four (two front doors and two rear doors). In 5-door arrangements the central door cannot be fitted with a soft close mechanism.

The diagram opposite shows the positions of the soft close mechanisms, depending upon which door arrangement is ordered so you can add the correct quantity to your order.

7.47

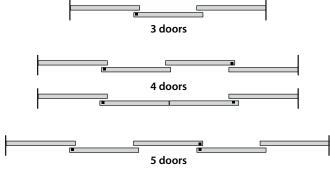

SLIDING WARDROBE INFORMATION

FIXING THE DOOR POSITIONERS

Bottom track door positioners

Aluminium door positioners need to be inserted into the bottom track.

Pull the doors to the closed position and mark on the bottom track the centre point between the doors. Slide the door positioners along the front and rear channels until the centre of each is at the centre point you have marked on the track. No screwing is necessary. For multi-door arrangements refer to the diagram opposite for correct placing of the door positioners. Or use the table below for dimensions.

Front of wardrobe Door po

Door positioners

Position for the back

POSITIONER DIMENSIONS

Depending on the frame profile you have chosen will depend on the dimension the door positioner will need to be in relation the liner, wall or end panel.

Use the below table to find the dimension required for the frame type you are using.

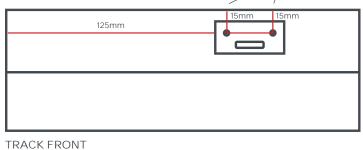

Door Positioner
13 mm
3 mm

Door Positioner

WARDROBE CABINET SPECIFICATION

To create a wardrobe cabinet the same specification as our stocked Linen wardrobe please use the below points.

WARDROBE CABINET SIZES:

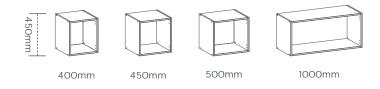

RECOMMENDED CABINET SPECIFICATION:

- 18mm Chipboard
- 2260mm high (including structual plinth 100mm_
- Cabinet depth 610mm (internal 558mm, void at back 22mm)
- Depth of internal space 560mm
- Total depth including stocked door 610mm
- Widths: 400 / 450 / 500 / 800 / 900 / 1000mm
- 1 x 22mm thick shelf set at 278mm from the top of the cabinet
- 8mm back panel
- 4 x Metal height adjustable feet

for voids) (Showing corner wardrobe shelf pack - sold separately. See page 2.16)

FEATURE STORAGE UNIT:

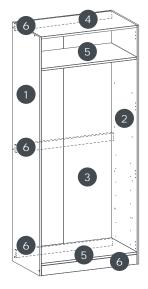

RECOMMENDED CABINET SPECIFICATION:

- 18mm Chipboard
- 450mm high

WARDROBE CABINET SPECIFICATION

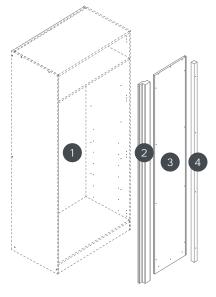

WARDROBE CABINET BREAKDOWN:

SINGLE / DOUBLE WARDROBE CABINET

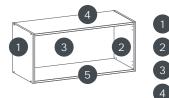

- 1 x 18mm left hand side panel
- 1 x 18mm right hand side panel
- 1 x 8mm back panel
- 4 1 x 22mm top
 - 1 x 22mm shelf and 1 x base panel
- 6 4 x Structural batons (1 x acts as structural plinth /3 x cross rail)

CORNER WARDROBE CABINET

SINGLE / DOUBLE FEATURE CABINET

- 1 x 18mm left hand side panel
- 1 x 18mm right hand side panel
- 1 x 8mm back panel
- 1 x 18mm top
- 1 x 18mm base panel

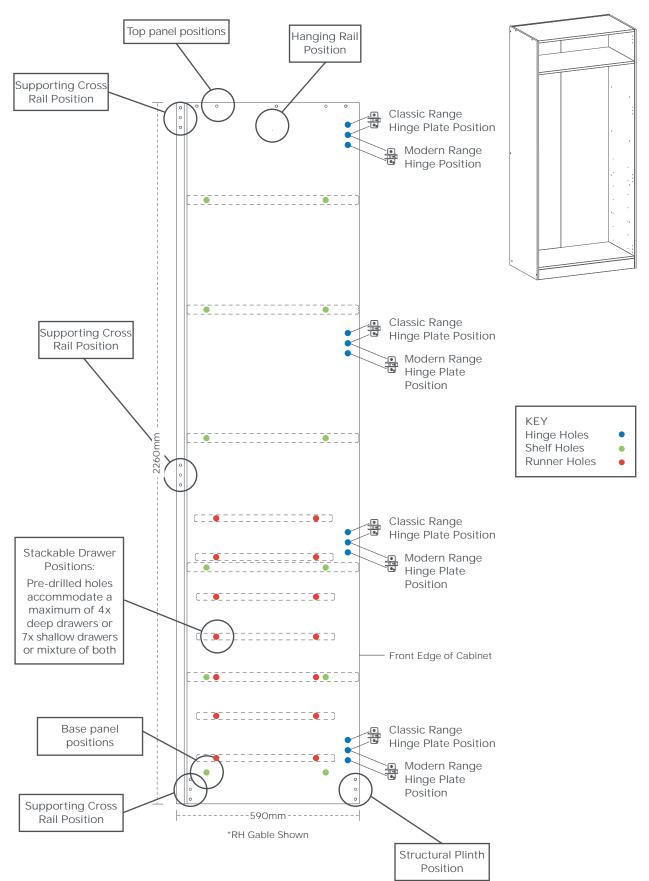

1000mm double wardrobe
 Corner post 2260mm (H)
 Blanking panel (linen)
 Spacer Rail (raw chipboard)

(For corner wardrobe shelf pack please see page 2.16)

DRILLING SPECIFICATION

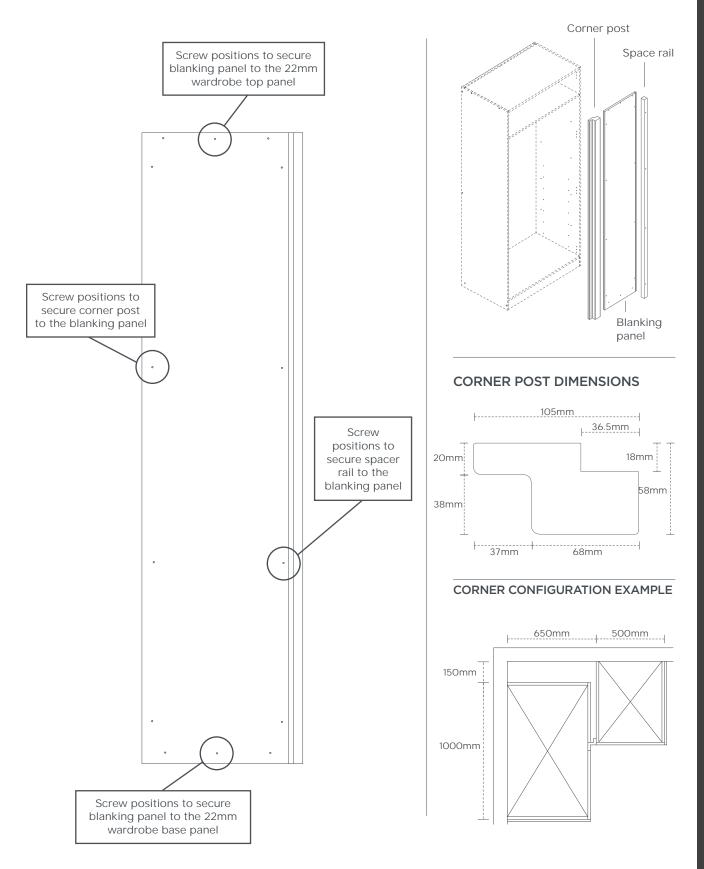

Our wardrobe cabinets are pre-drilled with 3mm diameter holes for internal pre-drilled holes that suit a variety of functions.

The below diagram illustrates the hole position with details of each function, please refer to key below. Subsequent pages contain details with critical dimensions relevant to each function

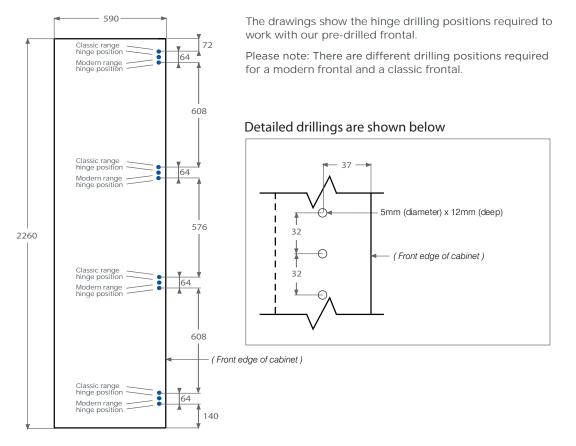

CORNER CABINET CONVERSION

We use a 22mm blanking panel and corner post to convert double robes into a corner wardrobe. The door used on a corner wardrobe should be hinged from the wardrobe cabinet - not the corner post. The corner post should be fixed and spacer rails used.
